Old Salt is an abstract game of sword and sandals, melding two of history's enduring components into a game of strategy and luck. This narrative game is designed to be played either using a traditional board with pips and numbers, or simply with a hand-drawn set of island cards. Old Salt is a game of three players, sea, ship, and sand, as each player controls the only ship sailing their first island. A player wins by being the last ship in the distance. Players begin the game as one of six factions with control of three islands, a fleet of ships and a handful of gold. A player obtains victory over the other players by controlling 6 islands or being the last ship sailing. There are many routes to that victory but the journey will without a doubt involve sailing your ships, firing cannons, seizing islands, and using faction abilities. Sail ships Players can move up to 3 ships on their turn and are able to move a ship up to 3 tiles unless aided by Known Tradewinds Ships are able to turn in any direction players desire. Think of the movie Pirates of the Caribbean where they dropped anchor and drift a U-turn and outmaneuvered the Black Pearl. Fire cannons Step one of firing your epic cannons, count the number of tiles to the target. That is the minimum you need to roll to hit the target. Step two, pay your crew to load and fire that cannon! 1 coin to fire a single shot. Roll to see if it is successful. If successful, place a damage token under the target, if unsuccessful, roll better next time. Seize islands When seizing an island, a player must first be adjacent to the island they would like to control. Once in position, pay 2 coins for the island along with a mast that belongs to the faction you are wrestling island control from. Seizing an island that is defended is very costly. For each

enemy ship that controls that island within 2 tiles adds 1 coin to the overall cost of seizing the island. Use faction abilities When playing with faction abilities, each player selects 1 of the 6 factions to be. Each faction comes with 3 exciting and unique abilities that no one else has access to. These will help players turn the tide of war. Abilities can cost coins to use or be limited on when you can use them, such as on your turn or when you seize an island. On the left side of each faction card

Features Key:

Use fire and maneuver tactics to crush enemy formations

- Bring mounted units into the action
- Battle is a different kind of game

Empire of the Petal Throne Games-Chronicles is either out or very soon to be out this month, and with it comes a new book, a new 200 piece PDF, and a new map for Empire of the Petal Throne: After Dien Bienphu. This new map is pretty neat. While it shows the areas many maps of Vietnam have never shown that easily, this one has amazing details into the layout and rivers.

- After Dien Bienphu Map
- 200 piece PDF for Empire of the Petal Throne
- Empire of the Petal Throne: After Dien Bienphu PDF

All you have to do is download all four of these and you are ready to start publishing and playing for free! As I mentioned in my last post, I am in the middle of self-publishing my Game of the Year for the past few years. This year, I have penned up a Game of the Year piece that deals specifically with strategy gaming. This article is an attempt at defining my thoughts on this (unfortunately rather dry) topic. The more I looked into it, the more I became convinced that this has always been an unsolvable problem in one sense – because no game or collection of games can ever claim to possess all the qualities that perfect a champion. So, I have pulled out the old sledge hammer of articles and given it a whack. Let me know your thoughts. First – what makes a true champion

Chapter 9: Signs “Kali!” Out of the corner of her eye, Kali saw the figure that was circling around the group. As it neared them, the group backed up. They were clearly surprised, but who wouldn’t be surprised seeing a gorilla in the jungle? A wild gorilla at that...but let her not’s fool them. That hair is unmistakably the old-timey style from one early Bulbagarden event- the Party to Unite Singing and Dancing for the Spiral. That crazy hair, her cooking hat, and her display of strength made her instantly recognizable. “Yo, Sherlock,” Kali said with a wink. “It’s nice to see you again.” * * * “Now, look up here!” said Nick with his own whisper to the younger kids. “No way!” said Toby with a fist to his face, although the look on his face was pure astonishment. “Au contraire. Could you just turn your head just a little more to the right?” “No.” “I said just a little more.” “No.” “I said just a little.” “Just a tad more.” “A little more, not even, like...” “Bam!” “You’ve got a knack, there, boy!” “Yea? Anyways, now can you just keep your eyes open like this?” “I said anything but...” “Could you turn more to the right?” “No!” “Just a little...” “Bam!” “Can you just...?” “Bam!” “You see, you really have a knack with taking advantage of eye

positions, doesn't she, comrades?" "Yes!" "Because the Hermit and I are going to use that principle to get information about the new spy, and about the secret that Darkstrom has." Mimi was the first to see
